**These are the Features That Make
NATIONAL Built-in Ovens and
Range Inserts Your Most Sensational Buy**

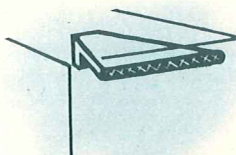

★ Help you sell new homes faster than ever before!

THE MAGIC DOOR OPERATES AUTOMATICALLY, controlled by momentary contact push-button switches. Press for complete opening or closing. Door will stop immediately upon release of the button. It operates only while the button is being pushed. Button panel is clearly marked for UP and DOWN operation. The door can also be opened or closed manually without affecting the special motor. Here, indeed, is unmatched convenience. Optional feature.

ROTISSERIE HOLDER AND ROTISSERIE operate on the same motor as The Magic Door. Both are purchased as one unit. Ingenious front-to-back unit has specially designed oven rack with spit holder built in. Simple enough to lift with a finger. Rotisserie operates at slow, even speed to provide automatic basting of the barbecued food. Optional feature.

OVEN VENTING. Vent opening is sloped downward to prevent discoloring kitchen cabinets and to provide uniform temperature throughout the oven. Standard on all models.

CHROMALOX MICROTUBE RANGE ELEMENTS become hot in 10 seconds. No open wires. Easy to clean. Give ample heat. Standard on all electric units.

RANGE CONTROL PANELS slope upward to bring control knobs in full view. No twisting, turning or bending when range inserts have to be used. Standard on all range units.

SATIN CHROME INTERIOR. Durable permanent finish, easy to keep clean and, when wiped only occasionally with light steel wool, will become brighter than new, enhancing its original beauty. Standard on all models.

OVEN INSTRUMENT CONTROLS are recessed to keep them cool while oven is in use. **LUX CLOCK** designed specifically for built-in oven. Never needs oiling, operates efficiently in extremely high temperatures. Easiest clock to use with only 3 simple settings. Standard on all models.

GAS RANGE BURNERS employ newly designed hypodermic lighters which give off almost no heat yet ignite burners instantaneously. Burner, burner bowls and cast grates are especially designed to produce the utmost in efficiency with minimum maintenance. Standard on all gas burners. Center simmer burners available as optional equipment.

GAS AUTOMATIC PILOT. This safety valve is a perfect safety measure, cutting off immediately in case of gas supply failure. There is no safer built-in on the market than NATIONAL. Optional feature. Automatic oven time control, standard on all electric models.

INSULATION is new Johns-Manville solid vat-type construction. Oven is completely sealed for maximum tightness to eliminate formation of moisture. The oven door is the thickest on the market, providing better insulation, preventing warpage by heat and abuse due to accidents. Standard on all models.

Standard on all units: Perm-a-view Glass Door. Interior Oven Light.

★ No other Built-Ins offer so much - so economically!

Antique Copper Model has true copper plating—not copper-colored enamel or porcelain. The copper finish will mellow and darken with age and use.

NATIONAL VANITY

National HOODS—designed to fit every kitchen

NATIONAL HOODS are easy to install, economical and available in a wide range of models and sizes. They are constructed of the finest quality material and completely processed to give years of trouble-free operation.

STANDARD HOOD SPECIFICATIONS

FAN AND MOTOR UNIT

Standard parts include motor and fan unit plus finished extension pipe 19" long.

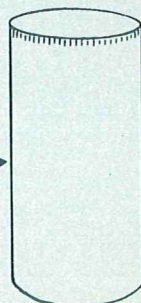

NEMA free air test rating 970 CFM.

Outstanding Features

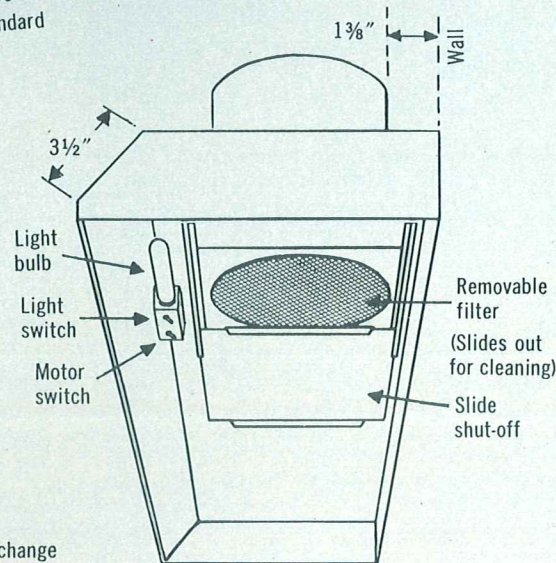

- Especially designed fan unit quietly ventilates range area without exhausting room heat.
- Indirect light can operate without fan unit. Use 75 watt showcase bulb.
- The durable laboratory-tested blower motor provides trouble-free service and is placed in the vent pipe, safely out of reach of fingertips.
- Small loss of cupboard space—permits the installation of full size cabinets directly over range area.
- The permanent filter slides out in a jiffy for easy cleaning with soap and water.
- Built-in switches eliminate need of extensive wiring.
- **NATIONAL HOODS** are available in 5 sizes to fit all installations, with a tapered front lip, which does away with sharp corners, allowing for door swing.

Finished extension pipe

When changing to rectangular duct work, use 3¼" or 3½" x 10" size.

Specifications subject to change without notice or obligation.
